

The seal of the Texas Comptroller of Public Accounts is faintly visible in the background. It features a central five-pointed star surrounded by a wreath of olive and oak branches. The words "THE COMPTROLLER OF PUBLIC ACCOUNTS" and "STATE OF TEXAS" are inscribed around the perimeter of the seal.

February 2025

Texas Administrative Code

Title 34: Public Finance
Part 1: Comptroller of Public Accounts
Chapter 9: Property Tax Administration
Subchapter H: Tax Record Requirements
Rule §9.3059: Certification of Appraisal Roll

- (a) The chief appraiser shall certify a copy of the annual appraisal roll for the appraisal district to the Comptroller of Public Accounts. The appraisal roll shall be submitted to the comptroller by the deadlines and in the form and manner provided in the Electronic Appraisal Roll Submission Record Layout and Instructions Manual published by the comptroller.
- (b) If requested in writing to the director of the Comptroller's Property Tax Assistance Division by the chief appraiser at least 30 days before the applicable deadline for submission of an appraisal roll, the deadlines may be waived, but only if the appraisal district can show good cause for late submission.
- (c) The director of the Comptroller's Property Tax Assistance Division shall deliver a written determination of the request for waiver provided in subsection (b) of this section, by email, facsimile transmission or regular first-class mail. An appraisal district may appeal the denial of a waiver to the comptroller. The comptroller shall decide each appeal by written order and shall deliver a copy of the order to the chief appraiser by email, facsimile transmission or regular first-class mail.
- (d) The Comptroller of Public Accounts will periodically revise the Electronic Appraisal Roll Submission Record Layout and Instructions Manual. Copies of this publication can be obtained from the Comptroller of Public Accounts, Property Tax Assistance Division, P.O. Box 13528, Austin, Texas 78711-3528. Copies may also be requested by calling the toll-free number 1-800-252-9121. In Austin, call 1-512-305-9999. Email requests may be directed to ptad.ears@cpa.texas.gov.

Overview

Since 1991, the Texas Comptroller of Public Accounts' Property Tax Assistance Division (PTAD) has worked to improve its School District Property Value Study (SDPVS) through the electronic transfer of information. In a forward-looking move, the Comptroller's office in 1991 proposed a joint project with appraisal districts aimed at obtaining appraisal roll data to improve the SDPVS, while simplifying the system for reporting local value to PTAD. Several pioneering appraisal districts joined the project in its first year. Currently, all appraisal districts participate in the Electronic Appraisal Roll Submission (EARS) process.

PTAD's Data Analysis Team (DAT) continues to improve the SDPVS system, the EARS processes and to facilitate appraisal district's SDPVS reporting requirements.

Electronic Reporting

The EARS process requires appraisal districts to submit appraisal roll information to PTAD in a standard electronic format. PTAD continues to work with appraisal districts on this process. Appraisal districts must submit all EARS information in one file.

PTAD will verify that an EARS submission is complete and will reject an incomplete EARS submission that is missing the necessary recap(s), taxing unit(s), Media Information Form (MIF) and/or EARS data file. PTAD performs data validation checks on the EARS data file and may reject a data file with material discrepancies greater than 2 percent. PTAD also will verify EARS-generated self-reports against appraisal district certified recaps and will reject submissions with significant discrepancies.

The appraisal districts must correct discrepancies, collect missing documentation and resubmit a complete EARS submission file within 10 days of the rejection.

PTAD uses EARS to generate the following reports:

- School District Report of Property Value;
- School District Stratification Report;
- Special District Report of Property Value;
- County Report of Property Value; and
- City Report of Property Value.

Important Changes for 2025

- **All fields in the AJR record are mandatory.** If you have the information applicable to that record, it must be included in the record. PTAD uses this information for many purposes, including legislative queries and testing for unequal appraisal of sold and unsold property. Not including the information when it is applicable and available can cause the appraisal district to fail testing for unequal appraisal of sold and unsold property.
- All AJR field names require the three-digit number instead of the two-digit number used in previous years. For example, field AJR01 is now AJR001.
- The parcel address collection is modified to include Geographic Information Systems (GIS) coordinates in preparation for EARS data to be used in GIS.
- Field AJR010, Parcel Address now requires only the street address portion of the parcel address. Do not include the city, state or ZIP code in this field.
- New field, AJR098, requires the city or post office used in the parcel address. This must be the same name the post office uses in the address.
- New field, AJR099, requires the ZIP code portion of the parcel address. This can be either the traditional five-digit or nine-digit ZIP code.
- New field, AJR100, requires the GIS latitude of the property.
- New field, AJR101, requires the GIS longitude of the property.
- New field, AJR102, requires the GIS Parcel ID for the property. This will allow us to match the EARS data to a GIS system.

Submission Dates and Deadlines

Comptroller Rule Section 9.3059 mandates submission of EARS for all appraisal districts by the following deadlines:

May 1: Appraisal districts may begin submitting test files. PTAD does not require test submissions, but they may identify issues in advance that result in a smoother final submission process, including an assurance of a data file with a less

than 2 percent error rate of taxing units that collect property tax. Appraisal districts that have new computer systems or software vendors should submit test files.

July 15: Deadline for the initial submission of a test file. After this date, test files may still be submitted; however, a late submission will require pre-arrangement with DAT staff to facilitate processing of your test file.

NOTE: If the appraisal district is testing the mandated formatting changes, test files do not need to include the current year's estimated or certified data.

Aug 1: Deadline for filing a final submission with certified values for appraisal districts with fewer than 200,000 but more than 10,000 taxable parcels, excluding Category G parcels. Use Category D parcels, not acres, in determining the number of parcels.

Sept 1: Deadline for filing a final submission with certified values for appraisal districts with fewer than 10,000 or more than 200,000 taxable parcels, excluding Category G parcels. Use Category D parcels, not acres, in determining the number of parcels.

Oct 15: Tax Rate and SDPVS Information Deadline to:

- Provide the adopted tax rates and/or indicating taxing units with pending tax rate elections by placing **Y** in the applicable column of Form 50-886-a, Tax Rate Submission Spreadsheet.
- Submit all SDPVS required forms including certified freeze recaps and/or required backup documentation.

Nov 15: Deadline for appraisal districts to provide a subsequent post-election submittal of Form 50-886-a, Tax Rate Submission Spreadsheet with the final tax rates.

Note: Failure to provide complete SDPVS forms and/or required information by the deadline may impact a school district's state funding.

Appraisal Roll Extensions

Comptroller Rule 9.3059 requires a chief appraiser to submit a written deadline extension request to the **PTAD director at least 30 days before the applicable submission deadline**. The PTAD director may extend a deadline if the appraisal district shows good cause for a late submission.

Good cause is an event outside the appraisal district's control causing an inability to comply with the deadline such as serious computer problems or a disaster that causes closure of an office. Good cause does not include pending appraisal district protests. If a protest period extends beyond the EARS submission deadline, you will file your estimated appraisal roll and then submit an update when the final roll is certified.

The written extension request must state the reasons for the extension request and the date by which the appraisal district will comply. PTAD makes every effort to grant extensions; however, PTAD staff must have adequate time to properly review and process the data for use in the SDPVS.

Electronic Submission

PTAD maintains a secure FTP site for EARS submissions at privatesftp.cpa.texas.gov/incoming/ptad_ears. This FTP site requires software other than the normal internet browsers for access. The software must support the SFTP protocol for file transfers and users must register for site access.

PTAD continues to examine other possible methods of file submission to improve this process.

EARS File Submission Process

To be considered a timely EARS submission, the file must contain 2 percent or less material discrepancies and include the following:

- electronic appraisal roll data (AUD, AJR and TU2 records) for each taxing unit that collects property tax;
- signed Comptroller Form 50-792, Electronic Appraisal Roll Media Information Form (MIF); and
- computer-generated certified recaps for each taxing unit that collects property tax that include:
 - category values;
 - exemption totals; and
 - the agricultural valuation breakdown with the prior land-use classes for wildlife and timber-in-transition and soil/timber type classes for timber in production and timber at restricted use.

1. Zip all submissions into one zip file placed on the FTP site on or before the due date.
2. Name the EARS data file in the following format:

XXXEARSMMDDYY.csv

(XXX = appraisal district number and MMDDYY is the date the appraisal district submitted the file).

3. Compress the EARS data file, MIF and certified recaps into one file (using WinZip or a similar program that uses a WinZip compatible compression format).
4. Name the zip file in the same format as the data file, using a .zip extension (XXXEARSMMDDYY.zip).
5. Transmit the complete EARS file submission via the FTP site.
6. **Notify PTAD at ptad.ears@cpa.texas.gov after placing a file on the FTP site. The appraisal district is responsible for verifying PTAD's receipt of the submission.**

NOTE: PTAD will reject incomplete EARS file submissions and files with too many errors. PTAD may reject EARS files that do not match the recap values or that show changes in values that cannot be explained. **Rejected EARS file submissions are not timely submissions.**

Electronic Appraisal Roll Submission (EARS)

Taxpayers, school districts, appraisal districts and state and local elected officials benefit from the collection and transparency of the statewide information provided through the EARS process. The EARS data file includes information on each parcel of property within an appraisal district's boundaries, regardless of whether the ARB approved the property record.

Required EARS Documentation

Because the EARS record layout does not include all the information PTAD requires, you must submit additional information in the appropriate required form.

Tax Code Section 5.09 requires PTAD to collect information to report the total appraised values, taxable values and tax rates of each county, municipality, school district and special district. Tax Code Section 5.09(a-1)(1) authorizes PTAD to prescribe the format for submitting this data.

Place the required forms and supporting documentation, in Adobe PDF format, on PTAD's FTP site in one zipped file and notify PTAD of the submission at ptad.ears@cpa.texas.gov or email the zipped file and identify the taxing unit and attached forms in the subject line. The appraisal district is responsible for verifying PTAD's receipt of the required forms regardless of the method of delivery. The required forms and supporting documentation are listed below.

Except for Form 50-886-a, Tax Rate Submission Spreadsheet, if a form does not apply or is no longer required, indicate N/A on that form. Alternatively, you may provide a single separate statement listing any form and the associated taxing jurisdictions for which the form no longer applies or is not required. For example: There are no deferrals for the following school districts: District Alpha, District Beta, District Omega.

Do NOT fax or send blank forms. Be sure to use the most current version of the form.

Form 50-792, Media Information Form (MIF)

Form 50-792 provides important information about the number of records for each type and contact information. Each EARS submission must include a MIF, or the submission will not be processed. In-house forms must include a contact name and phone number for errors or problems with the submission.

The MIF is available at comptroller.texas.gov/forms/50-792.pdf.

Recap Documents

PTAD creates each taxing unit's property value report by summing the AJR or AUD records. Each total should balance to the chief appraiser's certified recap. PTAD uses this value comparison to verify EARS submission accuracy and completeness. PTAD will not accept submissions without certified recaps.

Create the certified recap from the main computer system. It should be a copy of the recap submitted to the taxing unit during certification. It **MUST NOT** be a special recap generated from the EARS file only.

Certified recaps must include the breakdown of category values, exemptions, losses, land classes receiving agricultural value, previous land classes for wildlife management and transition to timber and forest and soil types for timberland at productivity and restricted use for all taxing units included in the EARS submission that collect property tax.

You must submit a grand totals recap.

Form 50-886-a, Tax Rate Submission Spreadsheet

See **Form 50-886-b**, Sample Tax Rate Submission Spreadsheet, for additional information and examples.

See Appendix 7 for data format requirements.

- For all taxing units include:
 - an indicator if the tax rate is pending a ratification election;
 - the no-new-revenue tax rate (including I&S rate);
 - the voter-approval tax rate;
 - the general fund M&O tax rate;
 - the general fund I&S tax rate;
 - the percentage offered for the local optional homestead exemption (leave blank if not offered);
 - the actual levy expected;

- the value of any new property for truth-in-taxation purposes;
- the no-new-revenue tax rate for M&O purposes only; and
- the de minimis tax rate.
- For counties and cities include:
 - the emergency revenue rate; and
 - the percentage offered for the local optional child-care facility exemption.
- For counties include:
 - the farm-to-market or flood control fund M&O tax rate;
 - the farm-to-market or flood control fund I&S tax rate;
 - the special road and bridge fund M&O tax rate; and
 - the special road and bridge fund I&S tax rate.
- For counties, cities and special districts include:
 - **Payments to TIF(s)**: number of zones and total projected payments. Include computer-generated recap to verify the payment amount.
 - **Loss to Tax Deferrals**: the total loss to tax deferrals and a listing by account of last year’s actual levy lost that does not include penalties and interest.
 - **Loss to Freeze**: include the total loss to the freeze and a computer-generated recap or listing by account that includes the market and taxable value, the state and local exemptions and actual levy if the account is frozen.

NOTE: PTAD will not accept Loss to Freeze information submitted on paper forms instead of the spreadsheet.

Additional forms for school districts (if applicable)

- Form 50-755, Report on Value Lost Because of School District Participation in Tax Increment Financing (TIF);
- Form 50-767, Report on Value Lost Because of Value Limitations Under Tax Code Chapter 313; and
- Form 50-897-B, School District Tax Deferral and Freeze Data Submission Spreadsheet

NOTE: For 2025, PTAD will accept Form 50-253, Report on Value Lost Because of the School Tax Limitation on Homesteads of the Elderly/Disabled, and Form 50-851, Report on

Value Lost Because of Deferred Tax Collections Under Tax Code Sections 33.06 and 33.065, instead of the Form 50-897-B spreadsheet. Because of confusion about freeze data calculations, the forms may be used for 2025; however, only the spreadsheet will be available for freeze data beginning in 2026.

You can access these forms at comptroller.texas.gov/taxes/property-tax/forms/index.php.

EARS Data file

The SDPVS reporting system requires the EARS file format to be a comma separated value (CSV) text file. Each AJR, AUD and Top Ten Taxpayer (TU2) record must include the county ID number where the property is located and the submitting appraisal district’s ID number.

Record Types and Descriptions

The EARS submission file must contain each of the following record types containing information for each appraisal district account.

Record Types

The following record types define the information for each property. **Exhibit 1** indicates each record type, description and number of allowed occurrences.

Do not separate the data file into separate files for each record type.

EXHIBIT 1
Record Types and Description

Record Type	Description	Number of Occurrences
AJR	Account Jurisdiction Record	1 per account per property category per taxing unit
AUD	Agricultural (Open Space) Use Detail Record	0 if the AJR record is not category D1 and 1 per AJR record with category D1 except for county fund B or C records
TU2	Top 10 Taxpayers Record	1 to 10 per taxing unit

Account Jurisdiction Record (AJR):

You must use the AJR record type in defining each property. AJR records must have at least two occurrences (county data and school district data) but may have multiple occurrences depending on the property. AJR records that contain Category

D1 values must have an associated agricultural property type AUD record, except AJR records for county funds B and C.

This record contains the exemption amounts granted by each taxing unit, property category code, market value, exemption values and taxable value for the account. If an account has multiple property classifications, create a separate AJR record for each property category. Create one AJR record for each taxing unit that taxes an account.

If a taxpayer uses two or more accounts as one property, report one AJR record for the combined account or multiple records with a parent account number indicating they are related. If reporting only the one parent account, select the category that best defines the overall property use. If reporting individual accounts, indicate the category for the individual record. Indicate the relationship of the records by supplying the parent account number on each related record.

EXAMPLE:

A person owns a house on a lot and the vacant lot next to it and uses them for daily residential activities. Report this as one Category A account with the combined value of both properties or as one Category A account and one Category C account with the same parent account number for both records.

Agricultural (Open Space) Use Detail (AUD):

This record details agricultural land use information. The EARS file must contain an AUD record for each property taxed at productivity value in accordance with Tax Code Chapter 23, Subchapters C, D, E and H. This requires one AUD record for each AJR record that shows Category D1 property for each taxing unit for the account, except for County Fund Types B and C.

Do not submit AUD records for County Fund Types B or C.

Do not submit AUD records for properties with total exemptions (X Categories).

Top 10 Taxpayers (TU2):

These records contain information on the taxing unit's top 10 taxpayers. Each record contains information on one taxpayer and that taxpayer ranking (a maximum of 10 records per taxing unit). Submit each taxing unit's top 10 taxpayer records with a taxable value greater than zero.

Do not include records for taxpayers with zero taxable value.

Do not submit TU2 records for County Fund Types B or C.

Field Formats

PTAD defines each field as text or numeric.

Text Fields

Text fields may contain almost any character – spaces, letters, numbers or special characters. This includes fields that may have only numbers if no math is done on the field. **Text fields may not include double quote marks (ASCII code 034 – ") in the data.** This character has a special meaning to PTAD's file processing system. PTAD's computer system does NOT recognize two sets of double quotes (""") used together to indicate that the second is a double quote character.

If text field data is not the specified length, leave the data as is. Do **NOT** fill the field with spaces or zeros. If the text field data is longer than the specified length, truncate the field at the maximum length.

If the field contains a comma, place a double quote mark (ASCII code 034 – ") before the field and after the field but immediately before the ending comma. Do not place the double quote characters around an empty field. The double quote characters do not count toward the field length.

Numeric Fields

Numeric fields contain numbers, decimal points and minus signs, but NO commas, dollar signs or other characters. The field definition for all numeric fields includes a total length and the number of decimal places (to the right of the decimal point). Decimal points and minus signs to indicate a negative number do not count toward the field length.

The difference between the total length and number of decimal places is the number of digits to the left of the decimal point. If the number does not fill the field, do NOT fill the field with leading or trailing zeros.

NOTE: A comma in a number causes the system to think the field ended and to move to the next field, causing rejection of the file for bad data.

EXAMPLES:

- The specification for field A is a number field with a format of 12 digits and 3 decimal places. It may contain any number from **999999999.999** to **-999999999.999**.

- To represent a data amount of -321.4, the field would contain **-321.4**.
- To represent a data amount of 1,235,642.23, the field would contain **1235642.23**.

How to Sort Records

Records do not require sorting or grouping in any specific fashion but keeping all records together by record type (all AJR, all AUD and all TU2) eases reviewing the data in its raw format.

Common Errors

Each year PTAD receives appraisal district data with several common errors. If the EARS validation programs detect errors in required data fields for any record type, PTAD will reject the entire record. PTAD will reject the entire data file if it includes too many rejected records. If the data file is rejected, PTAD will reject the entire EARS submission file. A rejected EARS submission file will require the appraisal district to revise all invalid data at a record/element level and to resubmit the entire EARS submission file (MIF, Data file, and accompanying documentation) with corrected information. If your EARS submission file is rejected, it will not be considered a timely submission and it may negatively impact your appraisal district. We strongly suggest taking advantage of PTAD's EARS test file services to assist in locating and correcting common errors in advance of submission.

EARS File Errors

- **Error rate greater than 2 percent.** The EARS file must include the most accurate data for all taxing units that collect an ad valorem tax. Inaccurate data can cause the system to reject a record. If the value of the rejected records exceeds 2 percent of the value in the file, the system may reject the file. Submitting a test file can help identify any reporting issues.
- **Including Appraisal District records in EARS file.** PTAD does not accept records for the appraisal district (taxing unit type code 01) in the EARS file. If you include appraisal district records, it may cause the file to be rejected for an error rate greater than 2 percent.
- **Incomplete EARS submission.** The submission must include:
 - EARS data file (AJR, AUD, and TU2 records);
 - a complete MIF; and
 - certified recaps for each taxing unit that collects property tax.
- **Incomplete certified recaps submitted with the EARS data file.** Complete recaps must include:
 - a breakdown of the category values;
 - a listing of all exemption totals; and
 - the agricultural valuation breakdown, including the breakdown of the timber and wildlife values.
- **Invalid characters in file.** The EARS file uses a comma-delimited format, requiring a double quotation mark (ASCII character code 034—"") around fields that contain a comma. Double quotation marks in the data cause a file processing error. Double quotation marks commonly are present in the legal descriptions or property addresses. Change double quotation marks to single quotation marks or apostrophes (ASCII character 039 – ') before writing data to the EARS file. Null characters (ASCII character 00) also stop the file from being processed.

If the file cannot be processed by our automated system, the system will reject it.

EARS Record Errors

- **Invalid value for year built.** The year built must be a numeric value between 1500 and the current year. EARS requires this if there are improvements listed for the property. This field must be zero (0) if there are no improvements.
- **Invalid value for last reappraisal year.** This field must have a valid year. If this is a new property, then this field should have the current year.
- **Construction status not matching the percentage complete.** The construction status is yes if the main improvement is currently under construction that started before Jan. 1 but is not complete on Jan. 1. This field should be no if the construction is complete or has not yet started as of Jan. 1. This field is also no if there is no improvement on the property.
- **Insufficient land value or excessive improvement value reported.** Category C1 represents vacant lots. Vacant lots may have only nominal improvements left from previous use of the lot, such as a fence or a carport. If there is a significant improvement or personal property left from the previous use, the lot should still show the category of its

previous use, not Category C1. If the category is reported as C1 – Vacant Lots, the land value must be equal to at least 85 percent of the property’s total reported land value. PTAD will reject records that have less than 85 percent of the total reported value for the record as the land value.

- **Invalid category code.** PTAD continues to receive EARS records with invalid category codes. PTAD validates EARS records by examining each field for valid values and the whole record for incompatible field values. For example, a record with a Category D1- Qualified Open Space Land cannot also have an Improvement Market Value (AJR036) because Category D1 is land only. The system would reject the record with an Invalid Category Code error. Using internal appraisal district category codes on EARS records can also trigger a category error code. For example, mistakenly reporting an internal category code of C2 when the county is ineligible to report Category C2 - Colonia Lots and Land Tracts will cause the system to reject the record with an Invalid Category Code error.

See the *Texas Property Tax Assistance Property Classification Guide* (comptroller.texas.gov/taxes/property-tax/docs/96-313.pdf) for a listing and explanation of all valid property classifications.

- **Homestead indicator marked yes (Y) for non-homestead accounts.** The homestead indicator (AJR039) should be marked **Y** if the appraisal district received or approved an exemption or deduction that only applies to homesteads for the account, regardless of whether the property had value deducted for a state-mandated or local homestead exemption. Mark the field for all non-homestead accounts as **N** to indicate that it is not a homestead.

Homestead-only exemptions do not include a Tax Code Section 11.22 disabled veteran, surviving spouse or surviving child exemption because that exemption may be applied to any property, either homestead or non-homestead.

Homestead-only exemptions include:

- mandatory or local optional general homestead;
- age 65 or older or disabled persons;
- 100 percent disabled veteran or surviving spouse;
- surviving spouse of a service member killed in the line of duty;

- surviving spouse of a first responder killed in the line of duty;
- disabled veteran’s home donated by a charity;
- elderly or disabled owner tax limitation (freeze); and
- homestead value limitation (cap).

If the exemption was received or approved for any taxing unit, mark the field **Y** for all taxing units that tax that property, regardless of any exemption loss.

NOTE: AJR039 is an indicator that the property is a homestead. It is NOT an indicator that the property qualifies for the state-mandated homestead exemption or a local optional percentage homestead exemption. Some homestead properties may qualify for some of the homestead exemptions without qualifying for the general homestead exemption.

- **Invalid taxing unit for the appraisal district being processed.** PTAD requires an AJR record for each taxing unit that levies an ad valorem tax on a parcel. Tax Code Section 1.04(12) defines a taxing unit as a political unit that is authorized to impose **and** is imposing an ad valorem tax on property. PTAD assigns each taxing unit a specific identification number. Appraisal districts must use this assigned specific number to report the data in the EARS file. The EARS file must have only the taxing unit ID numbers PTAD has assigned and recorded in that county.

Each June, PTAD sends every appraisal district a list of its active taxing units in the PTAD computer system. If a taxing unit is not listed, the appraisal district should request that PTAD generate a new number or, if the taxing unit was formerly taxed in that county, reactivate the number. The appraisal district may request that a taxing unit be deactivated and removed from its list if the taxing unit is no longer levying an ad valorem tax in the appraisal district.

The appraisal district **MUST** verify that the taxing units reported in its EARS file have the correct taxing unit ID number from this list.

NOTE: An EARS file may be rejected for records with taxing unit numbers that PTAD did not assign; taxing units marked as inactivated in PTAD’s records; and active taxing unit numbers reported for the wrong county.

- Invalid category for totally exempt or taxable value.** PTAD has received records incorrectly reporting a Totally Exempt Amount (AJR034) combined with a taxable amount (AJR035, AJR036, AJR037, or AJR038) on a single AJR record. Although an account may be a mix of taxable and tax exempt, such as inventory when some cars are leased for personal use and some cars are leased for business use, a separate AJR record is required for each property category on an account. The taxable value (AJR035, AJR036, AJR037, or AJR038) must be reported on one AJR record and the value for the Totally Exempt Amount (AJR034) must be reported on a separate AJR record. Additionally, the Category (AJR031) code must be valid for the specific value reported.
- Invalid county for Category C2.** PTAD has received records for category C2 in counties that do not have colonias according to the secretary of state. This may be the result of using internal category divisions such as C1, C2 and C3 to classify properties within the appraisal district’s software system. These internal classifications should be mapped to a valid PTAD category code for EARS file reporting.

Category C1 is for reporting Real Property: Vacant Lots and Tracts. These are generally small vacant tracts of land

or property held by a developer or builder awaiting development or construction. These lots are NOT colonias pursuant to Local Government Code Chapter 232.

Category C2 is for reporting Real Property: Colonia Lands and Tracts. Colonia lots are housing developments along the border region that lack basic services such as drinking water, sewage treatment and paved roads. Only counties authorized to have colonias within their borders should report property in Category C2.

PTAD does not have any other subdivisions of Category C and will not accept records with other codes.

Exhibit 2 is a list of counties eligible to have colonias according to the Border Colonia Geographic Database maintained by the Office of the Attorney General.

- Negative taxable value.** PTAD matches the AUD records to the AJR records for calculating the taxable value on a Category D1 record. PTAD found that using the reported market value and the productivity loss from the AUD record provides a better calculation of the taxable value than using the AJR record alone. Including other exemptions on the Category D1 AJR record may yield a negative taxable value. PTAD rejects all records that have negative taxable values.

Account Number	56789-12345	56789-12345	0000000056789-00000000012345

- Improper account numbers or short account numbers.** Always report the account numbers as they appear in your local appraisal district system. PTAD examiners should be able to identify the property in the appraisal district’s system by entering the reported property account number (AJR007) and short account number (AJR008). Only include leading zeros in the EARS file if the appraisal district system also uses leading zeroes.

Exhibit 3 is a graphic representation of proper and improper account numbers or short account numbers.

- Duplicate account number and category codes or Invalid account number.** Two AJR records cannot have the same account number, short account number and category code under the same taxing unit number. PTAD’s system creates a unique record identifier for each AJR record by linking the Appraisal District ID (AJR003), Taxing Unit ID (AJR004), Taxing Unit Type (AJR005), County Fund Type Indicator (AJR006), Comptroller’s Category Code (AJR031), Account Number (AJR007) and Short Account Number (AJR008). A duplicate unique record identifier will stop processing and cause rejection of the entire EARS file. The validation for nonduplicates, applies to city, county, school district and special district records.

EXAMPLE:

A 100-acre property has farm and ranch improvements, a residential improvement and 10 acres designated as home-
stead. For this account:

- code the residential improvement and 10 acres as Category E;
- code the 90 acres receiving productivity value as Category D1; and
- code the farm and ranch improvements as Category D2.

In summary, this account would have three AJR records under one taxing unit with three different category codes and at least two taxing units (the county and the school district) for the property. **Exhibit 4** offers a graphic representation of this example.

EXHIBIT 4:

XX99008899088	000-000-00	D1	90
XX99008899088	000-000-00	D2	0

XX99008899088	000-901-02	E	10
XX99008899088	000-901-02	D1	90
XX99008899088	000-901-02	D2	0
Total for XX99008899088 in taxing unit 000-901-02 is 100 acres.			
Total:			100

- Exemption amount submitted in incorrect field.** PTAD receives records with an exemption amount in the historical or other fields when the exemption is either a total exemption category or a different exemption named in the AJR records. To ensure proper credit in the SDPVS, report ALL exemptions in the correct fields. Local optional exemptions receive partial or no credit in the SDPVS. PTAD does not move exemption amounts to different fields in the EARS file.
- Top 10 taxpayer records not submitted.** Each EARS file must include top 10 taxpayer records for every taxing unit. PTAD continues to receive invalid TU2 records for counties. Common errors are duplicating county records by reporting additional records for funds **B** and **C**; reporting records with an invalid Taxing Unit Type code of **01**; or reporting invalid values (taxable value greater than market value or zero taxable value).

If the appraisal district computer system cannot include the top 10 taxpayer records in the EARS file, PTAD requires the appraisal district to submit the records in an electronic spreadsheet format using PTAD’s template.

- Incomplete/improper agriculture record fields.** A single AUD record may contain data for multiple types of agricultural acreage. Each land type will have 3 fields of data: an acreage value, a market value and a productivity value. These companion fields have dependencies with each other. If one of the three has a value, there must be values in the other two. Additionally, the market value must be greater than the productivity value. An error in one field of the set may result in multiple AUD record errors. PTAD has received records where companion fields are incorrectly completed.

- **Invalid percent ownership.** The percent ownership field (AJR026) allows for one integer and six decimals. It requires a number greater than zero and less than or equal to 1. Most records will be 1 indicating a single owner (100%). PTAD continues to receive records with a zero, indicating no ownership. There must be at least 1/100000th ownership for the record to exist. If the ownership is split to a percentage below your system's capability to report, fill this field with the minimum of 0.000001.
- **AJR and AUD records not matching.** PTAD requires that each AJR record for a Category D1 property have a matching AUD record, except for records for county FMFC and Special Road and Bridge funds. The records must match on the SDPVS Year, Appraisal District ID Number, Taxing Unit ID Number, Taxing Unit Type, County Fund Type, Account Number, Short Account Number and County located in. Any unmatched AJR and AUD records will be rejected.

Summary of 2025 Electronic Submission Changes

All Fields

All AJR record fields are mandatory and must be completed if the appraisal district has the information applicable to the record.

All AJR Fields

All AJR field names require the three-digit number instead of the two-digit number used in previous years. For example, the field AJR86 will now be named AJR086.

Field AJR086

PTAD clarified the instructions to Y if the main improvement is under construction on Jan. 1 or N if construction is either complete or not started. The field should also be N if there is no improvement on the property. PTAD corrected the validation tests for this field to match the instructions for AJR094.

Field AJR010

PTAD clarified the instructions for mapping fields and broke the address out into separate fields. This field is for just the street address of the parcel. This is the parcel address, not the owner's mailing address. Do not include city, state or ZIP code in this field.

Field AJR098

This is a new field for the city in which the parcel is located. If there is no city, use the same name that the post office uses in the address. This is the parcel address, not the owner's mailing address.

Field AJR099

This is a new field for the US Postal Service ZIP code for the parcel address. This may be the 5-digit or the 9-digit ZIP code. This is the parcel address, not the owner's mailing address.

Field AJR100

This is a new field for the GIS latitude of the property in the appraisal district's mapping system. This is a signed, 12-digit field with 9 decimal places. The latitude in Texas will range from approximately 25 degrees to 37 degrees. Enter 0 if your appraisal district does not use GIS information.

Field AJR101

This is a new field for the GIS longitude of the property in the appraisal district's mapping system. This is a signed, 12-digit field with nine decimal places. The longitude in Texas will range from approximately -93 degrees to -107 degrees. Enter 0 if your appraisal district does not use GIS information.

Field AJR102

This is a new field for the parcel identifier in the appraisal district's mapping system. This may or may not be the same ID as the account number or short account number. This will facilitate matching our records to GIS system records. Leave blank if your appraisal district does not use GIS information..

Record Layout Changes

Exhibit 5 shows the January 2024 record layout changes and **exhibits 6, 7, 8, 9** and **10** show the record layout changes from prior years.

Record Layout Changes: January 2024 Release

Field ID	Field Name	Description of Changes
AJR063	Optional Low-Income Housing Partial Exemption Amount	The validation check on the population has been changed to read 2.2 million.
AJR064	Mandatory Low-Income Housing Partial Exemption Amount	The validation check on the population has been changed to read 2.2 million.
AJR072	Tax Ceiling Amount	This field is now defined as the ceiling amount before the ceiling was adjusted for tax rate compression.
AJR087	Child-care Facility Exemption Percentage Offered	Added a field for the percentage offered by a taxing unit for child-care facilities. It is an integer that may range from zero to 100.
AJR088	Child-care Facility Exemption Amount	Added a field for the taxable value lost to the exemption for child-care facilities.
AJR089	Medical or Biomedical Property Exemption Amount	Added a field for the taxable value lost to the exemption on medical or biomedical property.
AJR090	Loss to Cap on Non-Homestead Real Property Increase Amount	Added a field for the taxable value lost to the "circuit breaker" limitation on the increase in non-homestead real property.
AJR091	Tax Deferral Amount	Added a field for the value of the tax levy deferred during the previous year.
AJR092	Tax Ceiling Amount (Adjusted for Rate Compression)	Added a field for the tax ceiling amount after the limitation is adjusted for tax rate compression.
AJR093	JETI Agreement Loss Amount	Added a field for the value lost due to JETI agreements.
AJR094	Current Year Percentage Complete	Added a field for percentage the construction of the main improvement was complete on January 1.
AJR095	Previous Year Percentage Complete	Added a field for percentage the construction of the main improvement was complete on January 1 of the previous year.
AJR096	Previous Year Land Value	Added a field for the value reported to PTAD in the previous year as land value.
AJR097	Previous Year Improvement Value	Added a field for the value reported to PTAD in the previous year as improvement value.
50-897-B	School District Tax Deferral and Freeze Data Submission Spreadsheet	Added a new spreadsheet for reporting freeze and deferral data when it cannot be reported in the EARS record.

Record Layout Changes: January 2023 Release

Field ID	Field Name	Description of Changes
AJR031	Property Category	A new validation check to ensure that AJR035, AJR036, AJR037 and AJR038 are zero if AJR031 is any X category.
AJR034	Totally Exempt Value	A definition clarification that this field should be the value after any ARB adjustments from protests.
AJR034	Totally Exempt Value	A new validation check to ensure that the value is less than \$2,500 for Category XB.
AJR034	Totally Exempt Value	A new validation check to ensure that the value is less than \$500 for category XC.
AJR035	Land Market Value (before cap is applied)	A new validation to ensure that this field has a value greater than 85 percent of the total reported value for the Category C1 record.
AJR035	Land Market Value (before cap is applied)	A definition clarification that this field should be the value after ARB adjustments.
AJR036	Improvement Market Value (before cap is applied)	A definition clarification that this field should be the value after ARB adjustments.
AJR037	Mineral Market Value (before cap is applied)	A definition clarification that this field should be the value after ARB adjustments.
AJR038	Personal Property Market Value (before cap is applied)	A definition clarification that this field should be the value after ARB adjustments.
AJR063	Optional Low-Income Housing Partial Exemption Amount	A new validation check to ensure that a portion of the taxing unit is in a county with a population over 1.8 million.
AJR064	Mandatory Low-Income Housing Partial Exemption Amount	A new validation check to ensure that no portion of the taxing unit is in a county with a population over 1.8 million.
AJR086	Construction Status	A Yes or No indicator if a property still had its main improvement under initial construction on Jan. 1.
All fields	Account Taxable Value	A corrected validation formula to include the productivity loss for D1 records when calculating the taxable value for each AJR record.
Tax Rate Import Spreadsheet	Column X	This is no longer used. Please leave it blank.

Account Jurisdiction Record Layout (AJR)

Field ID	Field Name	Type	Length (Total)	Decimal Places	Relational Field	Description
AJR001	Record Type	Text	3		AUD001 TU201	Use AJR . Generate one record for each category on each account in each taxing unit.
AJR002	SDPVS Year	Text	4		AUD002 TU202	Enter the tax year for the data submitted in this file. For the normal EARS data collection in August and September, this is the current calendar year.
AJR003	Appraisal District ID Number	Text	3		AJR081 AUD003 TU203	PTAD's numeric appraisal district ID code. This three-digit code is unique to the appraisal district that appraises the property, not the county where the property is physically located. PTAD publishes the codes on its website in the county directory. They run from 001 to 254 except 191. EXAMPLE: 001 – Anderson County Appraisal District 101 – Harris Central Appraisal District 188 – Potter-Randall Appraisal District
AJR004	Taxing Unit ID Number	Text	6		AJR005 AJR006 AUD004 AUD005 AUD006	PTAD's assigned taxing unit ID code. PTAD publishes the codes on its website in the county directory. If a taxing unit does not have a valid code, contact PTAD to assign one. EXAMPLE: 001902 is Cayuga Independent School District.
AJR005	Taxing Unit Type	Text	2		AJR004 AJR006 AJR031 AJR042 AJR043 AJR044 AJR068 AJR070 AUD004 AUD005 AUD006	Enter PTAD's two-digit taxing unit class code. This code is the original assigned taxing unit code and not the code that indicates the current taxing unit purpose if the taxing unit has changed. Valid Codes are: 00 - County 02 - School 03 - City 04 - Municipal utility district (MUD) 05 - Utility district (UD) 06 - Water district (WD) 07 - Levee improvement district (LID) 08 - Drainage district (DD) 09 - Improvement district (ID) 10 - Road district (RD) 11 - Hospital district (HD) 12 - Flood control district (FCD) 13 - Fresh water supply district (FWSD) 14 - Public utility district (PUD) 15 - Junior college or college district 18 - Navigation district or port authority 19 - Water control and improvement district (WCID) 20 - Water supply district (WSD) 21 - Water authority (WA) 22 - Irrigation district 23 - Conservation district 24 - Municipal water authority (MWA) 25 - Municipal water district (MWD) 26 - Water improvement district (WID) 27 - River authority <i>Concluded on the following page</i>

Appendix 1: Account Jurisdiction Record Layout (AJR) (continued)

Field ID	Field Name	Type	Length (Total)	Decimal Places	Relational Field	Description
AJR009	Parent Account Number	Text	25			<p>A unique number that indicates that two or more properties form one economic unit for appraisal.</p> <p>If a property has multiple owners, in divided or undivided interests or two or more parcels are used as a single property and would be sold together, provide a single AJR record that includes the total property value OR multiple AJR records with unique account numbers that include the value for each portion of the property. If the appraisal district provides multiple records, indicate the related records using a parent account number that is unique to each group of related records.</p> <p>EXAMPLE: Property 1 is a house on a lot, Category A. Property 2 is a vacant lot adjacent to property 1, owned by the same owner and used as part of the daily residential activities around property 1. Both property 1 and property 2 would have the same unique parent account number assigned.</p> <p>Leave this field blank ONLY if it does not apply to this record.</p>
AJR010	Parcel Address Street	Text	100			<p>This field is for the street address of the parcel. This is the house number and the street name only, not including the city, state, or zip code. This is the parcel address, not the owner's mailing address.</p> <p>This field is to assist in using our fields for mapping purposes.</p> <p>If the property does not have a street address, indicate in this field where the property is located, such as the legal description or other data used to indicate the situs of the parcel for taxing purposes.</p> <p>EXAMPLE: 100 West Main, Suite 100</p> <p>Do not leave this field blank.</p>
AJR011	Confidentiality Code	Text	1			<p>Indicate whether the property address is legally confidential.</p> <p>Do not leave this field blank. Enter Y or N</p>
AJR012	Legal Description	Text	200			<p>The property description found on formal documents; describes property in a manner that enables a person to locate it with government officials and usually filed with the county clerk.</p> <p>EXAMPLE: Lot 3, Block 1, Section 1, Hughes Tract</p> <p>Do not leave this field blank.</p>
AJR013	Most Recent Date of Sale	Text	8		AJR014 AJR082 AJR083	<p>The month, day and year of the most recent sale of the property. The date must have all eight digits, using leading zeroes for months earlier than October and for days earlier than the 10th.</p> <p>EXAMPLE: 05241998 represents May 24, 1998</p> <p>Leave this field blank ONLY if the property does not have a recorded sale date.</p>
AJR014	Second Most Recent Date of Sale	Text	8		AJR013 AJR082 AJR083	<p>The month, day and year of the sale of the property if resold within one year. The date must have all eight digits, using leading zeroes for months earlier than October and days earlier than the 10th.</p> <p>If this field is used, a most recent sale date must be included and must be a date older than the most recent sale date.</p> <p>EXAMPLE: 08241998 represents August 24, 1998.</p> <p>Leave this field blank ONLY if the property has only one or no recorded sale date.</p>

Appendix 1: Account Jurisdiction Record Layout (AJR) (continued)

Field ID	Field Name	Type	Length (Total)	Decimal Places	Relational Field	Description
AJR015	New Property Indicator	Text	1			<p>Indicate if the property is a new property as defined for Truth-in-Taxation purposes (did not exist in this taxing unit last year or the property owner substantially improved it since last year).</p> <p>Enter Y or N.</p> <p>Do not leave this field blank.</p>
AJR016	Verified Sale by Appraisal District Indicator	Text	1			<p>Indicate if the appraisal district verified that the sale is a valid arm's length transaction for the most recent sale date.</p> <p>Enter Y or N.</p> <p>Leave this field blank ONLY if the property does not have a most recent sale date recorded.</p>
AJR017	Market Area Code	Text	15			<p>A code attached to each parcel group that the appraisal district identified as being in a market area.</p> <p>A market area is one or more geographic areas in which similar properties compete in the minds of probable purchasers. The geographic areas in a market area may be non-contiguous.</p> <p>Leave this field blank ONLY if the appraisal district does not use a market area code.</p>
AJR018	Neighborhood Code	Text	15			<p>A code used by the appraisal district that identifies the subdivision or neighborhood in which the property is located.</p> <p>Leave this field blank ONLY if the appraisal district does not use neighborhood codes.</p>
AJR019	New Construction Amount	Number	12	0		<p>Enter the value of new construction on a property. Include repair, remodeling or maintenance costs that make a difference in the property's appraised value.</p> <p>This is a whole number entered without commas, decimal points or other non-numeric characters.</p> <p>EXAMPLE: A homeowner adds a room to the house that is worth \$20,000. Enter 20000 representing \$20,000 in new construction.</p> <p>Do not leave this field blank. Enter a 0 if there is no new construction.</p>
AJR020	SIC Code	Text	10			<p>The Standard Industrial Code (SIC) if the account has one. Enter the code used by the appraisal district for the property.</p> <p>EXAMPLE:</p> <ul style="list-style-type: none"> • If you use the code 552 for auto parts store, enter it as 5520. If you use the code 752C, then enter it as 0752C. • If you use the code 55, then enter it as 5500. <p>Leave this field blank ONLY if the appraisal district is not using SIC codes or if this is not a commercial or industrial property.</p>
AJR021	NAICS Code	Text	6			<p>The North American Industry Classification System (NAICS) groups industries based on the activity they primarily engage in. It uses a six-digit coding system to classify all economic activity into twenty industry sectors. NAICS replaces the U.S. Standard Industrial Classification (SIC) system.</p> <p>Leave this field blank ONLY if the appraisal district is not using NAICS codes or if this is not a commercial or industrial property.</p>

Field ID	Field Name	Type	Length (Total)	Decimal Places	Relational Field	Description
AJR079	Amount of Loss for Damage Caused by Disaster Temporary Exemption	Number	12	0	AJR078 AJR080	The amount of the exemption granted for a property damaged in a disaster and the property was assessed at least a Level 1 damage rating. EXAMPLE: 125235 represents \$125,235 Do not leave this field blank. Enter a value of 0 if this exemption does not apply to this property.
AJR080	Field Not Used (leave blank)	Text	1			Leave this field blank.
AJR081	County Located In	Text	3		AJR003 AUD003 AUD159	PTAD's numeric county ID code. This three-digit code is unique to the COUNTY that the property is physically located in, not to the appraisal district that appraises the property. PTAD publishes the codes on its website in the county directory. They run from 001 to 254. EXAMPLE: 001 – Anderson County 101 – Harris County 188 – Potter County 191 – Randall County Do not leave this field blank.
AJR082	Most Recent Sales Price	Number	12	0	AJR013	The amount of the most recent sales price for this property for which the appraisal district was able to collect data. EXAMPLE: 123456 represents \$123,456 Do not leave this field blank. Enter a value of 0 if there is no sale or the appraisal district was unable to gather a sale price.
AJR083	Second Most Recent Sales Price	Number	12	0	AJR014	The amount of the second most recent sales price for this property for which the appraisal district was able to collect data. EXAMPLE: 123456 represents \$123,456 Do not leave this field blank. Enter a value of 0 if there is no sale or the appraisal district was unable to gather a sale price.
AJR084	Loss to Special Valuation	Number	12	0		The difference between the values reported in AJR035, AJR036, AJR037 and AJR038 and the taxable value before exemptions for a property that has a special valuation under Tax Code Chapter 23, Subchapter F or G, including deed-restricted recreational, park or scenic lands and public access airports. NOTE: This requires the full market value of the property to be reported in fields AJR035, AJR036, AJR037 and AJR038. If the assessed value is reported in those fields, this field should be zero. EXAMPLE: If a private park had a market value of \$100,000 and a special valuation of \$25,000 as reported in fields AJR035, AJR036, AJR037 and AJR038, enter 75000 in this field to represent the \$75,000 loss. Do not leave this field blank. Enter a value of 0 if this property is not a recreational, scenic, or park land or a public access airport.
AJR085	Bullion Depository	Number	12	0		The value of precious metals stored in a bullion depository in Texas. EXAMPLE: 123456 represents \$123,456 Do not leave this field blank. Enter a 0 if this property does not include precious metals stored in a bullion depository.

AJR086	Construction Status	Text	1			This field indicates if the main improvement is currently under construction Y or if the construction is either complete or not started yet N . The field should be N if there is no improvement on the property.
AJR087	Child-Care Facility Exemption Percentage Offered	Number	5	2	AJR088	<p>The percentage offered by a taxing unit if they adopt the exemption for child-care facilities. It is required for all properties, whether they receive the exemption or not.</p> <p>Enter the value of percentage as the number, not as a decimal. The maximum possible value is 100.00.</p> <p>EXAMPLE:</p> <ul style="list-style-type: none"> • 50% would be entered as 50 or as 50.00. • 20.5% would be entered as 20.50. • 0.5% would be entered as 0.05. <p>Do not leave this field blank. Enter a 0 if there is no exemption offered. Enter a 0 if this is a school district or a special purpose district.</p>
AJR088	Child-care Facility Exemption Amount	Number	12	0	AJR087	<p>The amount of the exemption granted for a child-care facility.</p> <p>EXAMPLE: 123456 represents \$123,456</p> <p>Do not leave this field blank. Enter a value of 0 if this exemption does not apply to this property. Enter a 0 if this is a school district or a special purpose district.</p>
AJR089	Medical or Biomedical Property Exemption	Number	12	0		<p>The amount of the exemption granted for medical or biomedical property.</p> <p>EXAMPLE: 123456 represents \$123,456</p> <p>Do not leave this field blank. Enter a value of 0 if this exemption does not apply to this property.</p>
AJR090	Loss to Cap on Non-Homestead Real Property Increase Amount	Number	12	0		<p>The amount of the loss to increases in the market value of non-homestead real property. This should be equal to the current market value of the property minus 120 percent of the previous year's market value minus new construction amounts.</p> <p>EXAMPLE: 125235 represents \$125,235</p> <p>Do not leave this field blank. Enter a value of 0 if this property is a homestead or if there is no loss to a cap on this property.</p>
AJR091	Tax Deferral Amount	Number	12	2		<p>The amount of taxes deferred by the property owner for this taxing unit during the previous tax year. Do not include taxes for other taxing units or taxes that were due originally for years other than the one prior to the SDPVS year of this EARS file.</p> <p>EXAMPLE: 1234.56 represents \$1,234.56 deferred tax levy</p> <p>Do not leave this field blank. Enter a 0 if no taxes were deferred.</p>
AJR092	Tax Ceiling Amount (Adjusted for Rate Compression)	Number	12	2	AJR071 AJR072	<p>The amount of the ceiling on taxes (freeze) on an elderly or disabled property owner's homestead, after the freeze was adjusted for tax rate compression.</p> <p>EXAMPLE: 1023.45 represents \$1,023.45</p> <p>Do not leave this field blank. Enter a value of 0 if there is no freeze (AJR071 = N).</p>

AJR093	JETI Agreement Loss Amount	Number	12	0		<p>The amount of any exemption attributed to a JETI agreement. This applies whether the agreement is in the construction phase or the incentive phase.</p> <p>EXAMPLE: 125235 represents \$125,235</p> <p>Do not leave this field blank. Enter 0 if the property is not included in a JETI agreement or if the record is not for a school district.</p>
AJR094	Current Year Percentage Complete	Number	5	2	AJR019 AJR086 AJR095	<p>The percentage of the main improvement's initial construction that was complete on January 1 of the current tax year.</p> <p>Enter the value of percentage as the number, not as a decimal. The maximum possible value is 100.00.</p> <p>EXAMPLE:</p> <ul style="list-style-type: none"> • 50% would be entered as 50 or as 50.00. • 20.5% would be entered as 20.50. • 0.5% would be entered as 0.05. <p>Do not leave this field blank. Enter a 0 if there is no improvement or construction had not started by January 1. Enter a 100 if the main improvement was finished construction on January 1.</p>
AJR095	Previous Year Percentage Complete	Number	5	2	AJR019 AJR086 AJR094	<p>The percentage of the main improvement's initial construction that was complete on January 1 of the previous tax year (January 1, 2024 for the 2025 SDPVS EARS file).</p> <p>Enter a 0 if there is no improvement or construction had not started by January 1. Enter a 100 if the main improvement was finished construction on January 1.</p> <p>Enter the value of percentage as the number, not as a decimal. The maximum possible value is 100.00.</p> <p>EXAMPLE:</p> <ul style="list-style-type: none"> • 50% would be entered as 50 or as 50.00. • 20.5% would be entered as 20.50. • 0.5% would be entered as 0.05. <p>Leave this field blank only if this is a new property that was not included in last year's EARS submission. Enter a 0 if there is no improvement or construction had not started by January 1. Enter a 100 if the main improvement was finished construction on January 1.</p>
AJR096	Previous Year Land Value	Number	12	0		<p>The market value, in whole dollars, reported last year for the land for this property in the identified taxing unit. This value is after ARB adjustments are made.</p> <p>Do not use a capped value.</p> <p>EXAMPLE: 12000 represents a \$12,000 land value.</p> <p>Leave this field blank only if this is a new property that was not included in last year's EARS submission. Enter a value of 0 if there was no land value on this account last year or if the property had received a total exemption. This field must be = 0 if AJR032 = D2, L1, L2, N or S.</p>

Account Jurisdiction Record Layout (AJR) EDITS

Field ID	Field Name	Edit	Message
AJR001	Record Type	AJR001 must equal AJR	Invalid record type
AJR002	SDPVS Year	AJR002 must equal the SDPVS year being processed. The SDPVS year being processed is determined by the date run. From January 1 through February 28 (or 29), this must equal the calendar year minus 1. From March 1 through December 31, this must equal the calendar year.	Invalid SDPVS year for this submission
AJR003	Appraisal District ID Number	AJR003 must be the appraisal district being processed. The appraisal district being processed is determined by the first three characters in the file name.	Invalid Appraisal District ID number for this submission
AJR003	Appraisal District ID Number	AJR003 must equal one of PTAD's assigned appraisal district IDs, from 001 to 254 except 191	Appraisal District ID number not a valid appraisal district
AJR004	Taxing Unit ID Number	AJR004 when combined with AJR005 must equal one of PTAD's assigned taxing unit ID numbers for the appraisal district being processed. The taxing unit must be listed in the PT2 database as a currently active taxing unit in the appraisal district and county being processed.	Invalid taxing unit for the appraisal district being processed
AJR005	Taxing Unit Type	AJR004 when combined with AJR005 must equal one of PTAD's assigned taxing unit ID numbers for the appraisal district being processed. The taxing unit must be listed in the PT2 database as a currently active taxing unit in the appraisal District and county being processed.	Invalid taxing unit for the appraisal district being processed
AJR005	Taxing Unit Type	AJR005 must equal one of PTAD's assigned taxing unit ID codes, from 00 to 52 except 16, 17, 29, 32, 34, 35, 36, 37, 38, 39, 42, 47 and 49	Invalid taxing unit type
AJR005	Taxing Unit Type	AJR005 must not equal 01	Appraisal district record reported
AJR006	County Fund Type	if AJR005 is not equal to 00, then AJR006 must be left blank	Invalid county fund type for the taxing unit reported
AJR006	County Fund Type	If AJR005 = 00, then AJR006 must equal A, B or C	Invalid county fund type for a county record
AJR007	Account Number	AJR007 must not be blank or all zeros	Invalid account number
AJR008	Short Account Number	AJR008 must not be blank or all zeros	Invalid short account number
AJR010	Parcel Address	AJR010 must not be blank	No parcel address provided
AJR011	Confidentiality Code	AJR011 must equal Y or N	Invalid confidentiality code
AJR012	Legal Description	AJR012 must not be blank	No legal description provided
AJR013	Most Recent Sale Date	AJR013 must be blank or a valid date	Invalid most recent sale date
AJR013	Most Recent Sales Date	If AJR014 is not blank, AJR013 must not be blank	Missing required most recent sale date
AJR014	Second Most Recent Sale Date	AJR014 must be blank or a valid date	Invalid second most recent sale date
AJR014	Second Most Recent Sale Date	If AJR014 is not blank, it must be <= AJR013 (AJR014 older date than or equal to AJR013)	Second most recent sale date newer than most recent sale date
AJR015	New Property Indicator	AJR015 must equal Y or N	Invalid new property indicator
AJR016	Verified Sale by Appraisal District Indicator	If AJR013 is not blank, AJR016 must equal Y or N ; otherwise AJR016 must be left blank.	Invalid verified sale by appraisal district indicator
AJR019	New Construction Amount	AJR019 must be >= 0	Non-numeric value for new construction amount
AJR022	Square Footage Size of Main Improvement	AJR022 must be >= 0	Non-numeric value for square footage size of main improvement
AJR023	Year Built	If AJR036 > 0, then AJR023 must be >= 1500 and <= system year	Non-numeric value for year built
AJR023	Year Built	If AJR036 = 0, then AJR023 must be left blank.	Invalid year built
AJR024	Central Air and Heat Code	AJR024 must equal Y or N	Invalid central air and heat code
AJR026	Percent Ownership	AJR026 must be > 0 and <= 1	Invalid percent ownership

Top-10 Taxpayer Layout (TU2)

Field ID	Field Name	Type	Length (Total)	Decimal Places	Description
TU201	Record Type	Text	3		For this record, use TU2 . Generate one set of up to 10 records for each taxing unit. Do not leave this field blank if the record is applicable.
TU202	SDPVS Year	Text	4	0	Enter the tax year for the data submitted in this file. For the normal EARS data collection in August and September, this is the current calendar year. Do not leave this field blank if the record is applicable.
TU203	Appraisal District ID Number	Text	3	0	PTAD's numeric appraisal district ID code. This three-digit code is unique to the appraisal district that appraises the property, not the county where the property is physically located. PTAD publishes the codes on its website in the county directory. They run from 001 to 254 except 191 . EXAMPLE: 001 – Anderson County Appraisal District 101 – Harris County Appraisal District 188 – Potter-Randall Appraisal District Do not leave this field blank if the record is applicable.
TU204	Taxing Unit ID Number	Text	6		PTAD's assigned taxing unit ID code. PTAD publishes the codes on its website in the county directory. If a taxing unit does not have a valid code, contact PTAD to assign one. EXAMPLE: 001902 is Cayuga Independent School District. Do not leave this field blank if the record is applicable.
